

Evidence summary and next interpretation

Cytotoxic module results, GO support and sensitivity are reported separately.

Contrast	Core delta	BH q (cell level)	QC same direction	Control-score agrees	Max QC SMD
Spl/C1	-0.131	0.059	NA	yes	NA
BM/C2	-0.100	0.22	5/5	yes	0.17
BM/C4	+0.086	0.025	5/5	yes	0.06
Thy/C2	+0.067	0.49	4/5	yes	0.18
Spl/C4	+0.061	0.3	5/5	yes	0.20
Spl/C0	+0.059	0.46	4/5	yes	0.19
Thy/C6	-0.049	0.4	5/5	yes	0.08
Spl/C5-2	-0.035	0.34	NA	yes	NA

Ranked by absolute expression difference, not selected for significance.
A cytotoxic transcript signature is not a killing assay; GO terms can share the same driver genes.
Independent biological replicates and functional assays are required to confirm treatment effects.
